IP1200
Pure IP PBX

A pure IP PBX designed to expand the capabilities of any business.

All Inclusive Complete Business Communications Solution

The IPitomy IP1200 is a powerful business communications platform. A pure IP PBX designed to expand the capabilities of any business, IPitomy extends the power of IP Telephony to businesses with up to 100 users. The IP1200 converges the present with the future in business telecommunications and will grow with your business assuring a smooth transition into the future. With features designed for today's complex business environment and flexible capabilities for all of your future needs, IPitomy is the smart choice for business telecommunications.

With the IP1200 managers and business owners have instant insight into employee status any time, any where… who's on the phone … who's away from their desks … when calls are going unanswered. With valuable information like that, your business can respond immediately to changes in customer and market demands, giving you that all important edge over your competitors.

Communicate quickly, simply across your entire company whether employees are in the office, on the road, or telecommuting from home. Your communications world just got a lot smaller. IPitomy's IP1200 leverages IP telephony and SIP technology to make state-of-the-art tools like softphones, remote phones, and branch office networking practical and affordable solutions for entrepreneurial business owners who want the best. Wherever your employees are located, with the IP1200 they can now communicate with each other just as if they were in the same physical location.

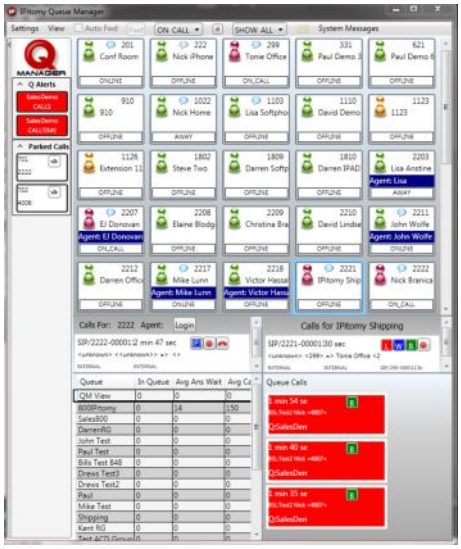
IPitomy

Telecommunications has been undergoing unprecedented innovation, driven by the fast paced evolution of technology. The information technology revolution brought about by the Internet has spurred world-wide growth of connectivity and infrastructure. Legacy telecommunications services are being replaced by SIP (Session Initiation Protocol) which is rapidly becoming the norm in business communications. The big advantage of SIP is that it makes voice and other media travel on the same data pipeline like the rest of the Internet. IPitomy can become your own cloud communications platform that can increase efficiency and reduce expenses dramatically.



Your customers appreciate efficiency.
Features like Follow-Me forwarding, corporate text messaging, simple point-and-click transfer and presence management, assure that your customers and prospects will experience the ultimate in customer service and return again and again to do business with you.

Investment protection is the name of the game.
Industry-tested and proven in hundreds of thousands of installations around the world, the open standards architecture on which IPitomy IP1200 is built will ensure that the IP PBX in which you invest today will remain a viable and valuable business asset now and in the future, but also that you will always be able to take advantage of the latest and greatest in technological advancements and feature enhancements. IPitomy uses the SIP protocol. This provides easy access to a world of exciting products and services like SIP Trunks that save money and increase productivity now and in the future.

With IPitomy IP1200, you are in control.
You choose the pace at which you introduce new features and functionality into your business. The IP1200 has all the functionality built-in and ready for you when you want it. Use traditional dial tone or move to SIP Trunks. Want your voice mails to be delivered by email? No problem, it's included. Advanced features like follow-me, Music on Hold, Conferencing are all included. Soft Phones can be used for a great alternative for traveling employees. IPitomy includes tools to allow your employees to control their phone features, forwarding and Voice Mail from an easy to use web page.

Beyond Traditional Expectations in a Business Phone System
The IP1200 has all the features you would expect from a business phone system, but that's just where the excitement starts. IPitomy has enhanced the entire application with IPitomy Q-Manager. IPitomy Q-Manager provides state of the art presence management, status of all users, text messaging plus presence and text on your mobile phone. Calls can be transferred, parked, recorded and monitored with the click of a mouse.

Mobility
Calls can be transfered from IPitomy back through the system from your mobile phone. Smart phones like IPhone and Android can even be an extension on the system by loading a SIP based soft phone.

IPitomy Text Messaging XMPP Server
Every IPitomy IP PBX includes an XMPP server integrated into the system. Employees can collaborate using voice and text messaging adding another dimension to your communications environment. IPitomy Text Messaging is compatible with a wide range of XMPP compliant clients so your communications environment can extend beyond the office to mobile devices such as smart phones and iPAD's.

Receptionist Console
With IPitomy DCM, operators and attendants can find and reach any and all employees and effectively and efficiently manage incoming calls … whether your company has a single location or multiple branch offices. Knowing the status of all users at a glance improves performance. Transferring calls by clicking on the user icon is much faster than the old traditional DSS console

VIP/Visually Integrated Presence Panel
Keep DCM visible all the time from a VIP Panel. The VIP panel is small and displays the DCM information on a small full color 9" screen that takes up a mere six inches of desk space. Your work won't get interrupted just to see who is available to take a call.

IPitomy IP1200 - Make the Most Out of Open Standards
Don't get stuck in the past with equipment that is already obsolete. IPitomy is state of the art and will keep your investment working for you now and into the future.
